Dynamics UK**[®]
The Ultimate in Stainless Steel Processing

Environmental Policy Statement

11th January 2025

The defined scope of the Environmental Management System for Steel Dynamics UK Limited is: The management of hazards, risks and associated environmental impacts with conducting business activities at Units 8 Walker Park, Blackburn BB1 2QE, including stockholding and supply of metals, and processing by laser, water jet, hi-definition, plasma profile cutting and CNC machining.

Steel Dynamics UK Limited has committed to recognising, reducing & preventing any environmental impacts directly related to the business, where reasonably practicable within the context of the organization.

Progress towards the Company's objectives will be achieved through continued planning, monitoring, reviewing and improvement of the significant environmental aspects and impacts.

Steel Dynamics UK Limited is committed to protect the environment, including prevention of pollution from our processing and storage. Steel Dynamics UK Limited is committed to reduce the use of non-renewable resources while also reducing the amount of waste produced by its operations.

Steel Dynamics UK Limited has a legal responsibility to comply with regulatory and statutory requirements and will facilitate these requirements by training and resources wherever necessary. This will be managed by the Environment Management System.

Implementation of the Policy will be achieved through communication to employees and involvement and training of employees, in the aims, objectives & rationale of the environmental management system.

Steel Dynamics UK Limited are committed to the continual improvement of the environmental management system to enhance environmental performance.

Overall responsibility for environmental safety at Steel Dynamics UK Limited rests with:

Ian Griffiths
CEO
